

The DOOR **Leadership Architecture**[®] is a **five dimensional**, modular and adaptable leadership development solution. Comprised by a landscape of **20 learning objectives**, a wide solutions portfolio, and an extensive array of learning programs and tools to choose from.

The Five Dimensions of Leadership Architecture[®]

We craft the leadership solutions to deliver true value through the exercises at different leadership levels.

Our engaging and holistic methodology helps our clients to solve specific leadership challenges for every leadership role in their organization.

It aligns the leaders, managers, teams and employees to the company's **strategic compass**.

Instead of an A + B program

Leadership Architecture® adapts to our client's specific-current situation by assessing their needs and helping the organization attract, develop, and retain their talents.

HUMAN to HUMAN APPROACH

With our human-to-human approach, a good diagnosis, supported by multiple assessment tools, and a deep understanding that Culture is the heart of Leadership.

CULTURE AT THE CENTRE

Culture is leaders-led and the only way our clients achieve their mission and results, is by living their culture and putting it in the center of any learning engagement within the organization.

CO-ARCHITECTURE

Our client's needs will always be unique and different, and nobody will know their needs better; therefore, we share the blueprint of our methodology, so they can become co-creators of the solution.
